Diagonal Detail-Delightful Design

A sophisticated beautiful sweater in crochet – and simple, too! Worked almost entirely in half double crochet and chains, this easy-to-make sweater has a knit ribbing around the sleeves and waistband. The front and back are identical pieces; however, the sleeves are different, one plain and one striped. Made with two unusual yarns from Stanley Berroco, Dji Dji is a wool and viscose yarn, fuzzy and soft to touch. Dante, an elegant nubbly yarn, is a rayon and cotton mix. Both yarns are available in 50 gram skeins. Dji Dji has 110 yards per skein; Dante, 90 yards per skein.

Directions are given for size small with changes for medium and large in parentheses. You will need 6 (7, 8) skeins each of Dji Dji and Dante, size H crochet hook (or size required for gauge), number 6 knitting needles and sewing thread for seams.

Gauge: 3½ sts equal 1 inch
3 rows equal 1 inch
TO SAVE TIME, TAKE TIME TO CHECK GAUGE.

BODY: (Make 2: One is front; one is back) With Dji Dji, ch 6, join with sl st to form ring.

All additional rows are worked on two sides only. With Dante: Row 1: Right side facing, join yarn in ch 2 corner, ch 2 for first hdc, hdc in each hdc to corner, in corner work (2 hdc, ch 2, 2 hdc), hdc to corner, 1 hdc in ch 2 sp. Turn.

Row 2: Ch 2 for first hdc, hdc in each hdc to corner, in corner work (2 hdc, ch 2, 2 hdc), hdc evenly to next corner. Continue to repeat Rows 1 and 2, working two rows with Dante and two rows with Dji Dji until piece measures 18 (20, 22) inches square, ending with Dji Dji, fasten off.

Row 1: Hdc in 3rd lp from hook and in each ch across, ch 2, turn.

Row 2: Hdc in each st, ch 2, turn.

Repeat Row 2 until 8 inches in length, fasten off.

Striped Sleeve: With Dji Dji, ch 60 (64, 68). Work even in hdc, for two rows. Then work two rows of Dante. Repeat until Dji Dji has been used three times, forming 3 stripes, then continue working evenly in hdc with Dante until 8 inches in length, fasten off.

Sleeve Ribbing: Using knitting needles and Dji Dji, pick up sts across bottom of sleeves.

Row 1: (P 1, p 2 tog) across. Work in k 1, p 1 ribbing for 2½ inches, bind off.

That's how Mrs. Wilma Petty of Cedar City, Utah, describes our new Morning Glory® Fiberseal® Dacron® batt. An accomplished needlewoman, Mrs. Petty has won many honors with her quilts—and enjoys using Fiberseal because it combines the best qualities of bonded and unbonded batts.

"It doesn't pull through fabrics . . . and is easy to roll out and handle," she says. "It is soft and fluffy, but has the firmness to keep it smooth and easy to spread without the stiffness of bonding."

See what Fiberseal does for *your* next quilting project!

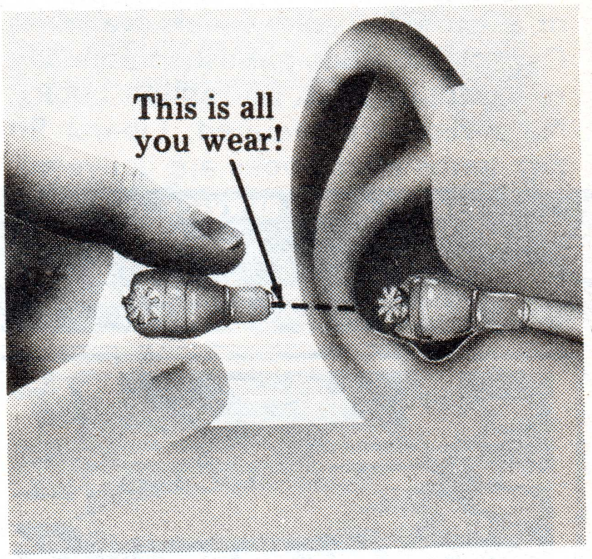
"I'm not deaf. I just can't understand some words."



No cords, tubes or wires.

If this is your problem...

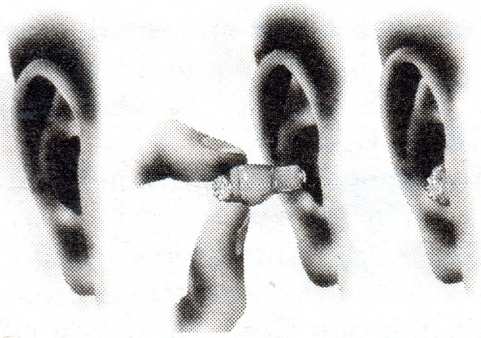
Well, you're not alone. You might have nerve deafness, a common form of hearing loss.

Many people develop mild to moderate hearing loss over the years, and not just people over 45. And it can take a lot of enjoyment out of your life.

But too many people don't find out if they can be helped. Of the estimated 17 million Americans who suffer from hearing loss, many have enough residual hearing to benefit greatly from a hearing aid.

Miracle-Ear® may be your answer.

And now there's a hearing system that might give you the help you need. Miracle-Ear® from Dahlberg Hearing Systems. It's so small that it fits completely and easily in your ear. No cords, tubes or wires. So in seconds you can have hearing amplification that's nearly inconspicuous.



So small, it fits completely in your ear.

Miracle-Ear can help many people overcome problems like hearing only parts of words...straining to hear,... asking others to repeat...or becoming confused when spoken to.

Now, not every hearing problem can be helped with a hearing aid, and no hearing instrument can restore normal hearing to someone with hearing loss. But many people can be helped.

Get the facts today.

Your Miracle-Ear professional consultant can help find out if Miracle-Ear is right for you, or if another product from Dahlberg's complete line of hearing systems is the answer.

Just complete the attached postage paid reply card and mail today.

If your family loves yogurt, it's an expensive snack. It's a simple process to make it yourself and inexpensive when you use non-fat dry milk powder. The starter should be plain, unflavored, unpasteurized yogurt. Once made, use your own yogurt as the starter. Cooking and freezing destroy yogurt bacillus or some of its healthful properties; however, they impart a delicious flavor to any dish. Because yogurt contains a fraction of fat and calories, use it in place of sour cream in most recipes. Use yogurt for thickening soups, stews or sauces. Do not boil, but add just long enough to heat.

Yogurt with Non-Fat Dry Milk Powder

Process on Low Speed, Forward Action to mix gently:

2 quarts warm water (110 to 115° F.)
3 heaping cups dry milk powder

Add and mix gently:

2 to 4 tablespoons plain yogurt

Yogurt must be incubated at 110 to 120° F. for 4 to 6 hours. Place in a warm place where the yogurt will not be disturbed while incubating, cover and let it incubate 4 to 6 hours. When yogurt is the consistency of a soft custard, it is ready to be refrigerated. It will continue to thicken while chilling. A short incubation period produces sweet yogurt, and a longer incubation period produces a tart yogurt. Makes 2 quarts yogurt.

Once you have made your yogurt, you may use your own yogurt as the starter for the next batch of yogurt. To flavor your incubated yogurt, add 1 to 2 teaspoons fresh or canned fruit per cup of yogurt, and stir well.

Yogurt Cheese

Line a colander with 3 or 4 thicknesses of paper towels, and place yogurt in colander. Cover with more towels and let it drain 8 to 10 hours in refrigerator. Use as cream cheese substitute. Use the whey in soup or baking. Yogurt which contains gelatin cannot be used to make yogurt cheese.

Yogurt Cheese Dressing

(A tart substitute for mayonnaise)

Process in Vita-Mix on Low Speed, Down-Release Action to mix:

1 cup yogurt cheese
2 tablespoons apple cider vinegar
¼ cup (or more if more sweetness is desired) frozen apple juice concentrate, thawed
1 teaspoon prepared mustard

Makes about 1½ cups.

Flavorings for Yogurt

2 apples, cored and chopped
2 to 3 teaspoons cinnamon sugar

Use fresh or cook slightly. Divide among 4 one-cup containers.

2 peaches, peeled and chopped
Sugar if needed

Use fresh or cook slightly. Divide among 4 one-cup containers.

1 banana, peeled and chopped

Divide among 4 one-cup containers.

2 teaspoons your favorite jelly, jam, preserves or pureed fruit per each one-cup container

Yogurt Salad

Process in Vita-Mix on Low Speed, Down-Release Action just to mix:

1 cup yogurt
1 (20 oz.) can crushed pineapple
1 cup shredded coconut

Delicious as a salad, or as a breakfast. Makes about 4 cups.

Yogurt Dips

Cucumber: Mix 1 medium cucumber, chopped, with 1 cup plain yogurt. Top with **one** of these: chives, mint, nutmeg, cinnamon, chopped red pimiento, olives, minced onion, garlic.

Avocado: Purée avocado, and gently mix in 1 cup yogurt. Add a dash of lemon or lime juice.

Nuts: Chop ½ cup nuts, mix in 1 cup yogurt.

Chocolate Yogurt Freeze

DO NOT attempt this recipe with any other appliance.

Freeze 2 cups of yogurt in freezer container. Have ready:

2 cups ice cubes or additional frozen yogurt – The tamper

Place the 2 cups of frozen yogurt on board and cut into cubes.

Process in Vita-Mix on High Speed, Forward Action to freeze:

The yogurt cubes
⅔ cup cold yogurt (not frozen)
⅓ cup sugar
3 tablespoons cocoa or carob

Use tamper through Action Dome to push the frozen yogurt through the blades. Ingredients should immediately turn into a thick, creamy freeze. If "ice cream" does not freeze quickly add enough extra ice cubes while Vita-Mix is running on High Speed Forward to freeze the contents. Turn off switch and remove Action Dome and dip out ice cream, or let run longer and dispense through spigot.

Yogurt Rolls

DO NOT attempt this recipe with any other appliance.

Process in Vita-Mix on High Speed, Forward Action to warm (1 to 2 minutes):

2½ cups flour (can be part whole wheat)

Stop Vita-Mix and add:

1 teaspoon honey
1 tablespoon vegetable oil
1 egg (room temperature)
1 package dry yeast
½ teaspoon salt

Process on High Speed, Forward-Reverse Action twice to mix. Scrape sides of container with wet spatula. Knead using Down-Release Action 6 times, then stop and punch dough down with wet spatula. Continue kneading until dough is tender and springy. Add up to ¾ cup additional flour, 2 tablespoons at a time, until dough forms a nice ball.

Turn onto lightly floured board, kneading gently and using only enough flour to prevent sticking. Pat or roll into rectangle about 4 x 12 inches. Cut into 2 inch squares, and place on greased baking sheet. Let rise in warm place until imprint remains when dough is touched. Brush top and sides with melted butter. Bake at 425° for about 20 minutes. Makes 12 rolls.

2 cups cucumber, cubed (peeled if desired)

Stop Vita-Mix, add and mix on Medium Speed, Forward:

2 cups plain yogurt
1 cup small curd cottage cheese
¼ teaspoon dill
Dash of pepper

Refrigerate. Serve garnished with parsley. Makes 4 servings.

Special Corn Bread

Process in Vita-Mix on Low Speed, Forward to mix:

½ teaspoon salt

Pour into greased 8 inch baking pan. Bake in preheated oven at 425° for 20 to 25 minutes. Cut into 9 squares.

Carrot-Pineapple Yogurt Pie

Prepare 10 inch Graham Cracker Crust. Chill.

Drain, reserving pineapple for garnish:

1 (8 oz.) can crushed pineapple

Measure ⅓ cup of the pineapple juice. Pour into small saucepan. Sprinkle 1 package plain gelatin over juice and let stand 5 minutes to soften. Heat gelatin mixture over very low heat until it dissolves. Cool.

Place in Vita-Mix, process on Medium Speed, Forward-Reverse Action to chop:

3 or 4 medium sized carrots, cut into cubes

Stop Vita-Mix and add to container:

¼ cup honey
1 teaspoon vanilla
2½ cups yogurt cheese
The gelatin mixture

Mix on Low Speed, Forward-Reverse Action, then 30 seconds on Forward. Pour into prepared crust. Chill thoroughly. Garnish with reserved pineapple.

Frozen Strawberry Yogurt

DO NOT attempt this recipe with any other appliance.

Cut into quarters and place in Vita-Mix:

2 (8 oz.) packages frozen strawberries

Process on High Speed, Forward using tamper through Action Dome to push the frozen fruit through the blades. When fruit has gone through the blades once or twice, stop.

Add to Vita-Mix and process on High Speed, Forward:

1 cup plain yogurt

Ingredients should immediately turn into a thick, creamy freeze. If "ice cream" does not freeze quickly add enough extra ice cubes while Vita-Mix is running on High Speed Forward to freeze the contents. Turn off switch and remove Action Dome to dip out to serve.

It is essential that items be removed from the dryer as soon as tumbling stops. Otherwise, wrinkling will occur. If clothes are accidentally left in the machine for some time after drying, they can often be "saved" by retumbling a few minutes with a dampened towel.

Ugly Fat? I Have a Secret!

I have a reducing secret so sensible, you'll see immediately (once you learn it!) how easily, how naturally it can help you shed unwanted pounds.

Sorry, I won't give away the secret here, because I make my living helping people like you lose weight. But I will share the secret with you if you'll send me $3. (You can split the cost and share the secret with friends — that's O.K. with me — and of course I'll refund your money if you don't agree this is the safest, easiest, most natural way to lose weight you've ever heard.)

I will tell you this: the cost of the secret plan is your **only** cost. There's nothing more to buy — ever. No pills, no special foods, no gadgets or gimmicks. You eat regular meals, same as everybody else, except that with my secret, you **automatically** eat less. And you'll be glad to know that the basis for my secret was discovered by an internationally-famous doctor at a world-reknown University.

Don't you think you owe it to yourself, your health, your good looks to send now? Especially when it won't cost you a cent if my secret doesn't work for you the very first day you try it?

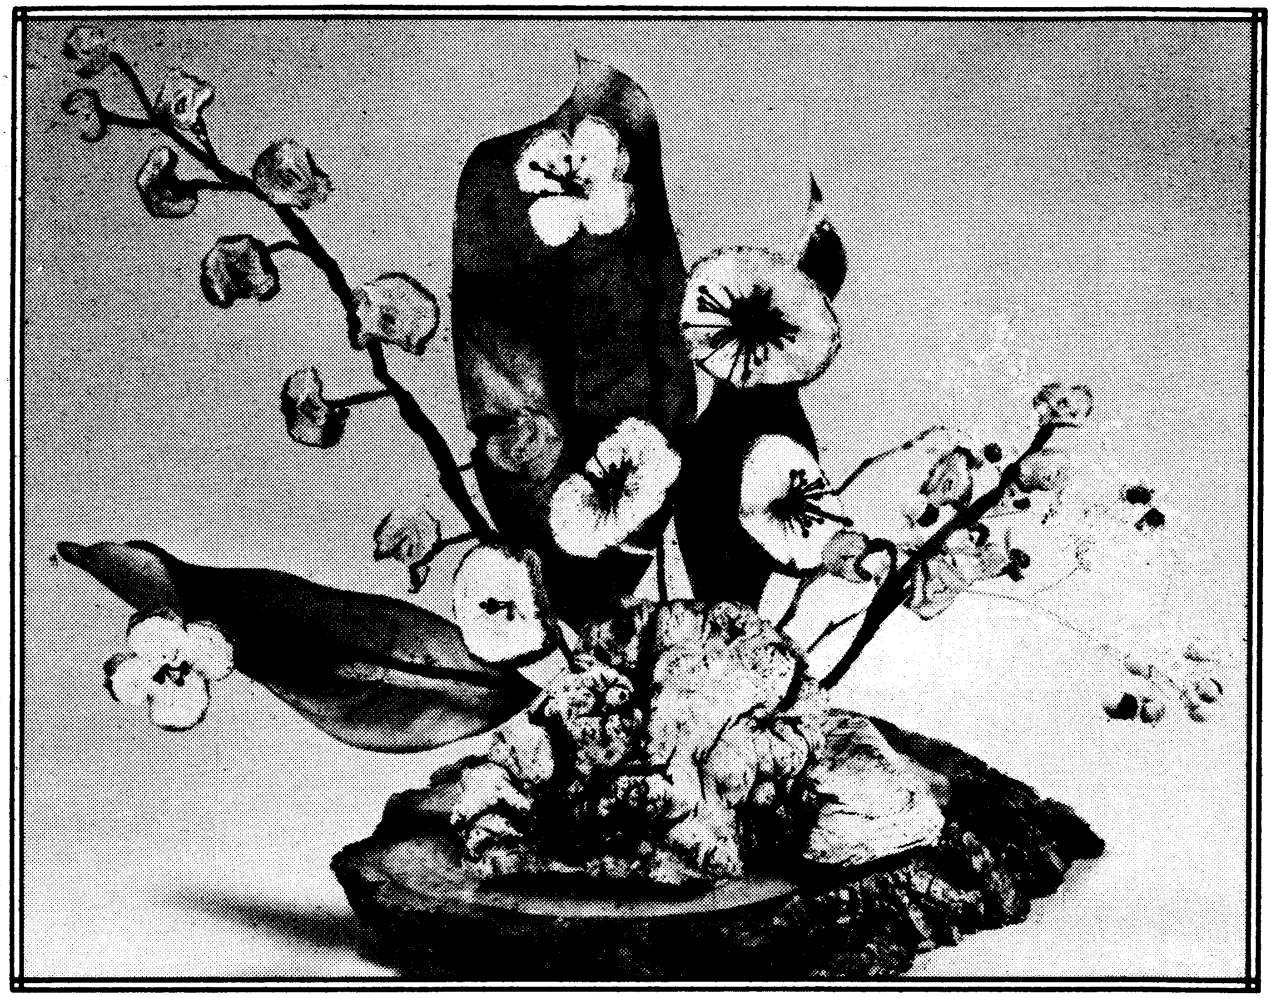
Vege-Flowers



Vegetables are good for other things besides eating. Dried slices can be turned into flowers to add extra interest to fall arrangements of seed pods, grasses and other dry materials gathered from fields and woods.

Various types of vegetables can be used but only potatoes and carrots are used in the arrangement illustrated. Most of these are readily available in gardens or vegetable bins.

Potatoes are used for larger single flowers. Those 1½ to 2 inches in diameter are a good size. Carrots work nicely for making the groups of florets for geraniums or the long spikes of larkspur. For spike type flowers, choose a carrot at least 1 inch in diameter at the thick end and cut slices of graduating size. For floret type flower heads, all of the slices should be nearly the same diameter.

Vege-flowers

Continued from page 38

Wash the vegetables but do not use a brush as the skin should not be damaged. Pat dry with cloth or paper towel. Cut crosswise slices about ¼ inch thick. Carrot slices left round will dry into interesting shapes. Potato slices can be left round or can be cut into petals at the edges to make dogwood type flowers (Photo 1).

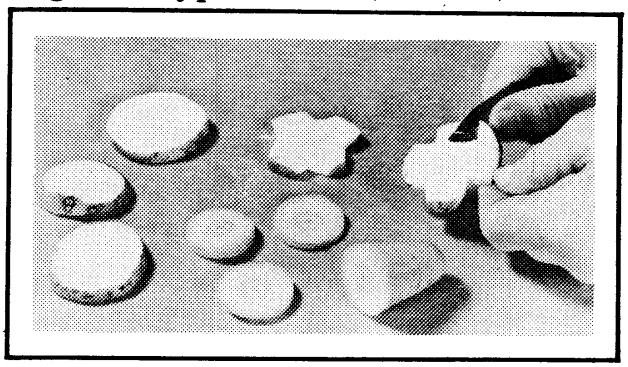

Photo 1

Lay paper towels on broiler rack or directly on oven rack and arrange vegetable slices on towels. Slices should not touch each other. Set oven at 150° leaving door open a crack so moisture from slices can escape as they dry. Turn slices over several times during drying process and dry until "leather hard." This may take four to six hours. Small carrot slices will be ready before larger ones and before potatoes. When slices reach "leather hard" stage, remove from oven. Use an awl or icepick to punch two holes about ¼ inch apart, one hole on each side of center (Photo 2). Punch through from one side, then turn the flower over and pass point of awl back through hole from opposite side to enlarge hole so it will stay open as flower continues drying. If you wait to punch holes until slices are completely dry, the slices may break, especially potatoes which become quite brittle. Carrots remain tough. Leave "leather hard" slices on paper towels to finish air drying.

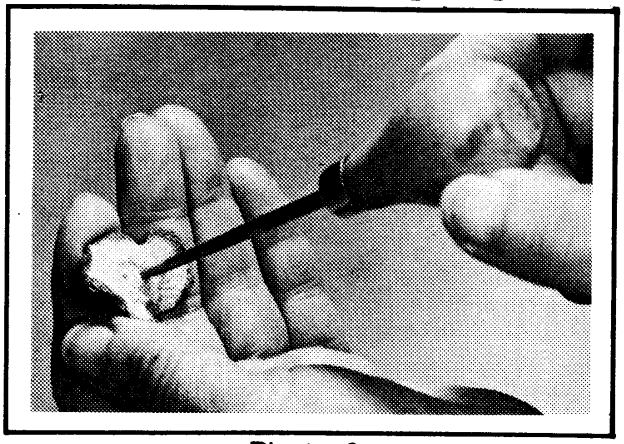

Photo 2

Carrots will retain their color but potatoes are apt to darken during drying process. They can be painted with acrylic paints or hobby enamels.

The flat potato flowers look best when stamens are added. Use commercial flower stamens. Fold two stamens in half and push folded point of stamen through each of the holes in flower. Use 6 inch length of fine wire, 28-30 gauge for short flower stem. About 1 inch from one end, bend flower into "U."

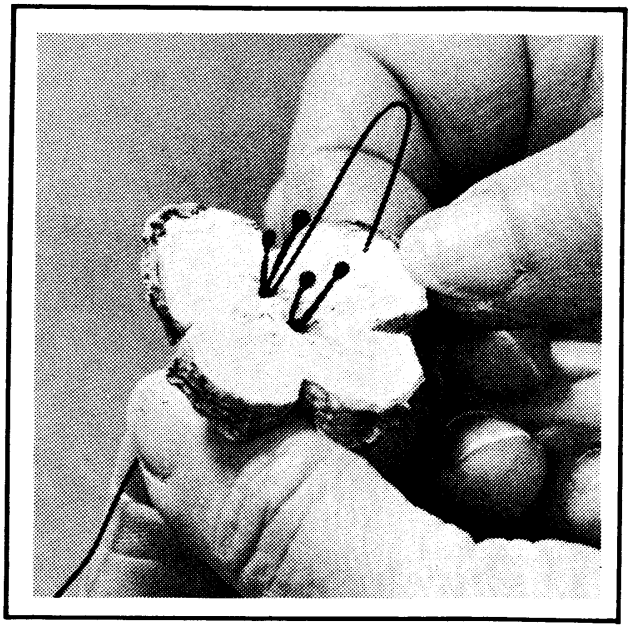

Photo 3

Pass long end of wire through one of the holes and pull it down (Photo 3), pass opposite end of wire through other hole and pull down until curve of "U" is against top of flower. Twist two ends of wire tightly around ends of stamens and around each other below flower to make short flower stem. For main stem of single flower, cut piece of 16 gauge flexible wire as long as you wish flower stem to be. Hold stiff stem

wire against base of flower and twist short stem around it. Use green florist's stem wrapping tape to cover stem wire. Begin wrapping tape around stem just under flower. Wrap tightly for six or eight turns to make calyx, then spiral wrap tape down wire to cover stem (Photo 4).

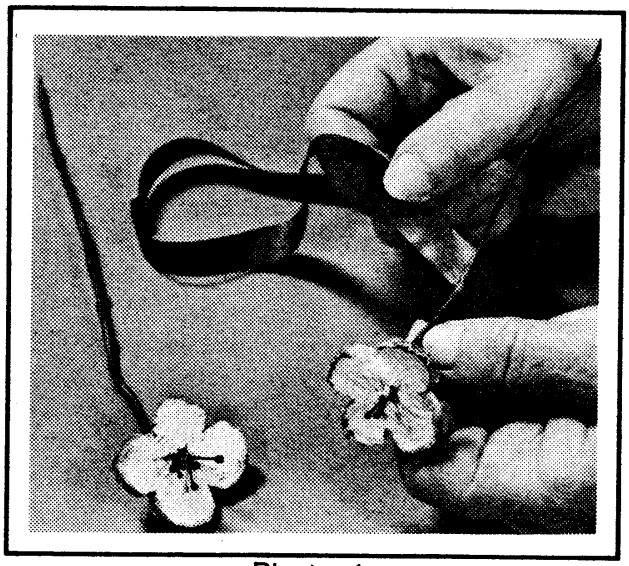

Photo 4

To make carrot flower spike, cut 6 inch length of fine wire, bend into "U," pass through the holes of flower and twist wire ends together. Wrap short stem wire with florist's stem wrapping tape, making individual florets. To make flower spike, begin with smallest carrot floret and tape to long stem wire as for potato flowers. Just under the flower, begin wrapping down about 1 inch with tape. Lay stem of next smallest floret against long stem and continue wrapping with tape. Add florets at intervals in this manner until there are as many florets on stem as desired (Photo 5).

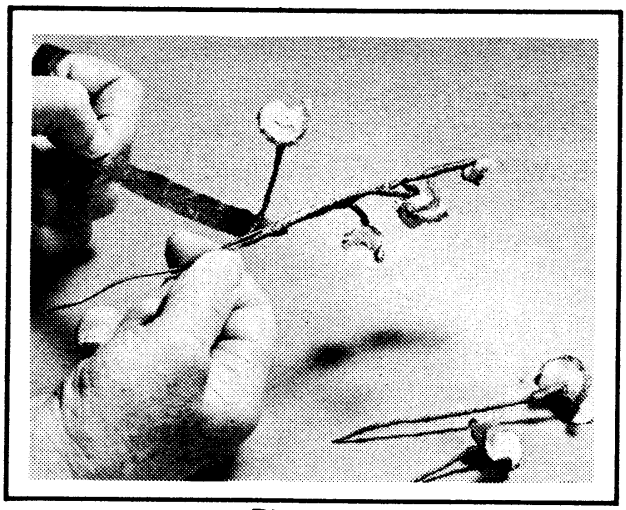

Photo 5

Prepare as many flowers as desired to add to variety of dry fall materials gathered earlier. A "needle" type flower frog will hold vege-flowers. Double back ends of stems and wedge between needles. Bend stems into graceful, natural positions (Photo 6).

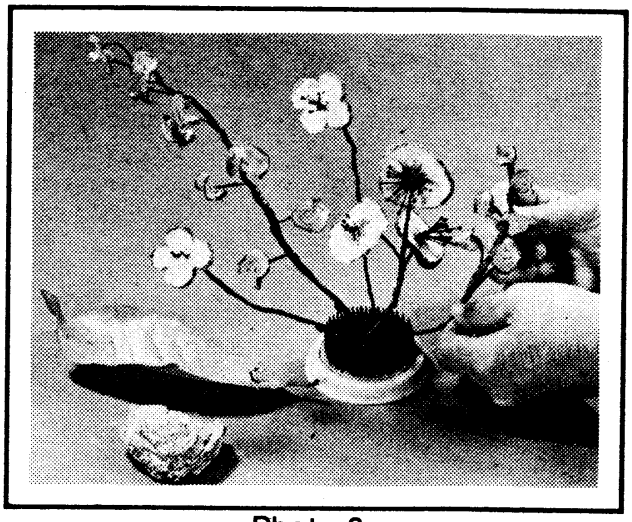

Photo 6

Choose suitable base for arrangement. A low pottery bowl, a piece of rough wood or a slab cut from a tree limb are all compatible with flowers and fall materials. Add whatever dry things suit your fancy. This arrangement is enhanced with bittersweet, dried baby's breath and dry magnolia leaves. A piece of rotted stump wood conceals the "needle" type flower frog.

Back to school time means getting lunch boxes and thermos bottles ready. To clean and remove stale odors, wipe the lunch box with a baking soda solution. A thermos bottle should also be filled with soda solution, shake, and allow to soak overnight (bottle stopper and covers need soaking too). Rins well and dry.

Cheney. Because Laura loves this house.

Laura and her husband worked hard restoring this old house. But then an illness made it impossible for Laura to climb stairs. They could have moved to a one-story house, but Laura loves this house. A Cheney Wecolator™ was Laura's solution. It lets her ride from floor to floor quickly and comfortably. It's UL approved, virtually maintenance-free, and can be installed on almost any stairway; straight, curved or even spirals.

Hyacinth in a Glass

If you like things simple and easy, if you like to watch nature at work, if you like the unusual in gardening, here is an adventure for you and your green thumb to contemplate.

The basic necessities – in fact, the only necessities are the hyacinth bulb, a hyacinth glass and water. And, oh yes, a cool, dark sprouting place.

The hyacinthus is a small genus belonging to the large lily family. But more fascinating, it is a true bulb. The hyacinth bulb shows the ingenuity of nature at its best; it is a package which holds within papery scales a completely formed plant in miniature. Originally a native of Asia Minor, Holland is now the great producer of hybrids parented from *H. orientalis.*

When choosing hyacinths to force, select bulbs that measure 18 to 20 centimeters (7 to 8 inches) in circumference. These are listed as exhibition size. The larger the bulb, the larger and fuller will be the flower. Here are the named varieties you may order from bulb catalogs: red – 'Jan Bos'; pinks – 'Pink Pearl,' 'Lady Derby,' 'Marconi'; whites – 'L'Innocence,' 'Colosseum'; blues – 'Ostara,' 'Delft Blue,' 'Blue Jacket'; purple with a dark mid-rib – 'Ambassador'; yellow and orange – 'City of Haarlem' and 'Orange Boven.'

The hyacinth glass may be found in florist and garden shops. Usually these clear glass bottles are hand-blown and imported. Their modified hourglass style has a bulbous base into which the roots grow. It tapers to a narrow neck before flaring out to form a cup-shaped flange designed especially for holding the broad bottom of a hyacinth bulb in place. Special containers needn't be bought, however. Search your closet

for a vase with a crimped or flared neck or a jar whose opening securely grips the bulb.

When a catalog shipment arrives before you wish to start the hyacinths, open the package for ventilation and store bulbs in temperatures between 35° and 55°.

Should you want your plant to bloom in January, start the bulb early in October; for February flowers, prepare your hyacinth mid-October; and when spring blossoms of March and April are your desire, mark November as the appropriate starting time.

Having chosen your bulb and glass, fill the glass with water to its neck. The hyacinth bulb must rest just above or touching water only slightly. Submerging the bulb any further will cause rot. Check the water level weekly. As moisture evaporates, it needs to be replenished. Bits of aquarium charcoal placed in the container will sweeten cloudy water.

A hyacinth requires 14 to 15 weeks of temperatures between 35° and 50° in which to complete its rooting, sprouting and budding process. Any cool, but not freezing, dark, undisturbed spot, from a root cellar or basement to an uninsulated closet or attic, may be put to use. In southern areas cooling arrangements often are difficult to come by. In these instances, a gardener must become inventive. One alternative is an old, but workable, refrigerator set at the desired temperature.

After the hyacinth in its glass has been in seclusion a few weeks, evaporated moisture is absorbed by the basal plate that is the bulb's base and roots begin to grow. Within a month, pale leaf tips become visible. These emerging leaves open a pathway for an embryo flower bud awakening at the center of swollen, food-laden scales. When the flower stalk is tall enough to expose the entire length of folded buds, the time has come to reveal the meta-

Hyacinth In A Glass

Continued from page 59

morphosis of a once homely bulb, now grown into a fully developed hyacinth plant.

Brought into the light where temperatures in your living area range from 60° to 70°, the plant continues to grow. Its leaves deepen from pale to bright green in the process of photosynthesis. Its flower stem lengthens and separates the blushing buds. Here is nature at its most unique. Through the glass you observe the intertwining of white roots as they weave a lacy pattern. A delicately tinted, plump bulb rests comfortably in its flared nest. Bursting forth on its sturdy stalk is the hyacinth blossom in all its glory of beauty and sweet fragrance.

The hyacinth is a flower with a history. There once was a Viennese ambassador to Constantinople named Ghiselin de Busbecq who, in the mid-sixteenth century, glimpsed hyacinths among tall grasses and clover along the banks of Persian canals. He carried these treasures collected on diplomatic travels home to his European garden. The emergence of the hyacinth from the eastern Mediterranean reflected a sophistication in gardening that earlier belonged to Turkey alone. Their influence spread to the Italian Renaissance and hyacinths grew on farms and in gardens. The bulbs were planted in window boxes and sold at flower markets during that era. Greeks and Romans twisted hyacinth florets into garlands and chaplets to celebrate religious days and showered marriage couples with heavily scented blossoms, customs that later were embraced by Christian tradition.

JUDITH E. HILLSTROM

Many plants do better when planted in fall rather than in spring. In October and November, stock is dormant and plant has opportunity to become established in new location before growing time above ground in spring.

When is the best time to thin my hibiscus bush? Mrs. W.H., KY

Each year prune back a third and thin out about one-third of the old branches to ground level. Prune after bloom is past and after last frost.

I was given a San Jose female holly. How should I care for it? M.G., MA

A San Jose holly should be planted shallow in a slightly acid soil. The soil should be well supplied with humus and have good drainage. Hollies require plenty of moisture.

Walnuts from my trees are sticky and nutmeats are small, dark and dry. Why? I. H., CA

Kernel shriveling is often caused by anthracnose leaf spot. Spray periodically with fungicides during the growing season to control this disease. Also try pruning the tree for better air circulation.

I had a beautiful cyclamen given to me a couple of months ago. It had at least 50 blossoms, then died down. I cut it down. Did I do the right thing? If so, how do I care for it now? L.D., VT

After flowering, you should water and fertilize your cyclamen at the recommended strength every 2 weeks while new leaves are produced. Gradually reduce watering as leaves die down. Do not fertilize. Allow soil to become dry when all top growth is gone. Remove soil and dead leaves from the dry corm and replant with fresh soil. Keep the corm showing above the soil to prevent crown rot. Place in bright indirect light when new leaves develop, fertilize every 2 weeks and water well. When flowers appear, reduce fertilizer strength to one-half.

Garden questions are answered each month only in pages of The WORKBASKET, none answered by mail.
